## EDUCATION

### Bachelor's Degrees in Software Engineering

USTHB

2020 - 2023

Courses

- Bachelor's Degrees in Software Engineering

## PERSONAL PROJECTS

### Job Offer

#### InternShip project

07/2023 - 10/2023

Sonatrach

Description

- The Job Application Portal is a user-friendly website made with React (front end) and Django (back end). It simplifies the job application process, enabling users to apply for the organization's job offers. It streamlines applications, reviews, and decisions, benefiting both applicants and internal departments.

### Bike allocation

#### Final Year Project

04/2023 - 06/2023

Description

- "This site has two parts. The first part is a dashboard, created using Django and React. It allows the admin to track users, add stations and bikes to the system, and create payment cards. The second part is for clients to allocate bikes and make payments, with the backend developed using Django."
